EXPERIENCE

SureLock Homes Locksmiths - *Owner and Locksmith*

June 2021 - Present

- Founded and managed a locksmith business serving residential, commercial, and automotive customers.
- Built and maintained the company website to support customer inquiries and appointment requests.
- Provided on-site installations, repairs, rekeying, and emergency lockout service.
- Managed scheduling, inventory, client relationships, and financial transactions.

High Rise Solutions - *Executive Trainer*

June 2022 - August 2022

- Developed communication and sales skills through daily customer interactions.
- Managed time independently and led employee development meetings.
- Trained new hires in company sales processes and customer communication.

SafeKey First Locksmiths - *Mobile Locksmith Technician*

August 2019 - June 2021

- Diagnosed and resolved residential and commercial lock and security issues in time-sensitive situations.
- Tracked company transactions and inventory using Excel and Google Sheets.
- Demonstrated technical adaptability while independently managing mobile service calls.

Guitar Center Toledo - *Lessons Manager*

August 2017 - June 2019

- Managed lesson scheduling, billing, instructor payroll, and local marketing.
- Consistently exceeded monthly department revenue goals.

TECHNICAL SKILLS

Front End: JavaScript, HTML5, CSS3, React, Tailwind CSS, Flexbox, CSS Grid

Backend and Data: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JSON, HTTP

Tools: Git, GitHub, Postman, Vite, React Router, Recharts, Appwrite, Formspre

PROJECTS

LiftLab

React, JavaScript, Node.js, Express, MongoDB, Mongoose, REST APIs

- Building a beginner-focused workout application for exercise discovery, routine creation, and guided training.
- Built a RESTful Express backend with MongoDB and Mongoose supporting CRUD operations for workout routines.
- Organized backend logic into routes, controllers, and models with HTTP status and error handling; verified endpoints in Postman.
- Integrated an external exercise API with search normalization, filters, reusable components, and React Router navigation.

Expense Tracking App

React, Tailwind CSS, Express, MongoDB, Recharts

- Developed a full-stack CRUD application for recording income and expenses.
- Created responsive charts that update with user-entered data to show financial trends.
